EXPERIENCE

National Electronics Complex of Pakistan (NECOP)

Jul 2025 – Sep 2025

Software Engineer Intern

Onsite

- Prepared SDLC documentation for a Secure IP Camera Management System
- Developed a bidirectional UDP communication system in C# using multithreading and real-time acknowledgments
- Worked with OpenFPGA and Yosys for RTL synthesis and hardware design flows
- Enhanced a PyQt GUI application for dynamic Yosys script customization

PROJECTS

Luxury Ride Booking Platform (MERN)

- Developed a MERN stack platform for booking luxury transportation services with secure authentication

Ecommerce App Store (React Native)

- Built an ecommerce mobile application with API integration and checkout functionality

Camera Manager (C#)

- Developed a camera management system displaying up to 16 live streams in a grid layout

Lodge Link (React Native)

- Created a hotel management application for bookings, guest management, and staff coordination

Buyonix AI Ecommerce Platform – FYP

- Developing an AI-powered ecommerce platform with smart recommendations, virtual try-on, visual search, and multilingual chatbot support using MERN Stack and React Native

MockMind

- AI mock interview platform that simulates real technical and behavioral interviews with real-time questioning, scoring, feedback, and performance tracking through an interactive dashboard.

Resume Tailor Ai

- AI-powered MERN stack tool that optimizes resumes using job descriptions. It rewrites content with AI, enhances skills, and generates ATS-friendly CVs to improve job matching and hiring success.

SKILLS

Languages : Java, Python, C++, JavaScript

Frontend : React, React Native, Expo, HTML5, CSS3, TailwindCSS

Backend : Node.js, Express.js, Firebase, RESTful APIs, API Integration

Database : MySQL, MongoDB

Concepts : OOP, DSA, SDLC, Agile Methodology

Tools & Technologies : OpenFPGA, PyQt, Git, Figma, Microsoft Office

EDUCATION

Bachelor of Science in Software Engineering

2022 – 2026

Air University Islamabad
